

evonos

In addition to our standard 0.6 mm thick plates, significantly thinner micro low profile plates are now available in 0.3 mm. They are designed to be used in the anterior cranial region, uneven skull areas and sections with thin skin. In addition, the rose tone contributes to an improved esthetic result. Our expanded evoFix system offers surgeons a wider product choice for more application options and a better quality of life for patients.

evoFix Sterile

The established evoFix Sterile osteosynthesis system comes complete with screwdriver, screws and 0.6 mm or the new 0.3 mm thick plates. Sterile, ready to use and individually configured.

NEW

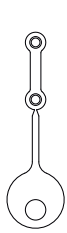

evoFix Sterile Mini-Tray

No need for the screwdriver? Then the new evoFix Sterile Mini-Tray is your best choice. The newly developed stand provides extra stability, and the smart design keeps the plates and screws safely in place. Also, it is far more sustainable since less plastic is used for the tray and packaging.

evoFix Micro low profile plates
